

**REMARKS/ARGUMENTS**

Please replace the original sequence listing and disk filed on March 18, 2002 with the enclosed substitute sequence listing in paper and computer readable format. In order to comply with Requirements for Patent Applications Containing Nucleotide Sequence and/or Amino Acid Sequence Disclosures, 37 C.F.R. §§ 1.821-1.825, Applicants submitted the first paper copy and computer readable format (CRF) of the Sequence Listing on March 18, 2002. In the first filed sequence listing sequences presented on pages 7 and 10 of the specification were inadvertently omitted from the sequence listing. The substitute sequence listing, submitted herewith, properly presents all of the sequences.

This paper is accompanied by a CRF (floppy disk) containing SEQ ID NOS: 1-96, and a paper copy of the sequence information which has been printed from the CRF. The information contained in on the CRF was prepared through the use of the software program "PatentIn version 3.1" and is identical to that of the paper copy. This amendment contains no new matter.

In addition, the sequence presented on page 36, line 7, has been amended to correct a typographical error and now conforms to the sequence as presented in Figure 23. Minor typographical errors in the specification have also been corrected. These amendments add no new matter as well. Accordingly, entry of this amendment is respectfully requested.
